888.482.7371    [www.machineguard.com](http://www.machineguard.com)

Since 1992, Machine Guard & Cover Co. has manufactured nonmetallic plastic machine guards in ABS, metal detectable ABS, PETG, Kydex, Polycarbonate and other materials to provide off the shelf and custom solutions for point guarding power transmission systems.

We can create guarding solutions for your specific application with custom flanges, unflanged guards, extra cuts, holes, bends, or Safety Captured Fasteners.

---

When properly installed, products manufactured by Machine Guard & Cover Co. are intended to meet the ANSI B11.19-2010 standards for guarding power transmission systems.

The full ANSI guarding criteria should be consulted for complete details.

**ANSI B11.19-2010: Performance Criteria for Safeguarding - Standard Requirements: 7.2.6**

The user shall ensure that guards are installed, maintained and operated so as to protect against:

- Unauthorized adjustment or circumvention;
- Hazards between the guard and the moving machine or tooling parts

**Explanatory Information: E7.2.6**

Guards installed in such a manner that tools are necessary for their adjustment or removal may satisfy this requirement.

Examples of some types of fasteners that should not be used are:

- slotted or Phillips head screws;
- wing nuts;
- magnets;
- latches and hasps;
- hooks and eyes.

The devices should be checked frequently for proper operation.

---

**Machine Guard & Cover, Co. is a member of the following industry organizations:**

National Safety Council

*Charting the  
Power of Industry*

Power Transmission Distributors Association

Society of Plastic Engineers

Association of State Dam Safety Officials

Michigan West Coast Chamber of Commerce

United States Federal Contractor  
Registration Verified Vendor

All products manufactured by Machine Guard & Cover, Co. are made in the U.S.A.

## Material Descriptions and Colors

Machine Guard & Cover, Co. forms and fabricates guards from several types of plastics.

ABS is the most common and most cost-effective material. ABS is a strong, tough and durable material that works well in most industrial applications. Black ABS plastic is recommended for outdoor applications due to superior UV resistance.

BL  
Black 3/16"

B8  
Black 1/8"

B4  
Black 1/4"

B3  
Black 3/8"

YE  
Yellow 3/16"

Y8  
Yellow 1/8"

Y4  
Yellow 1/4"

Y3  
Yellow 3/8"

Transparent PETG possesses great impact strength and chemical resistance competing with polycarbonate and is an FDA food and medical device contact approved material. PETG is sensitive to UV light and surface scratches easier than ABS.

PT  
PETG 3/16"

P8  
PETG 1/8"

P4  
PETG 1/4"

KYDEX-T has a fire resistance rating in accordance with UL Std. 94 V-0, 5V and also has superior chemical resistance. This material is used in special applications where fire or electrical hazards must be addressed.

KX  
Kydex-T Black 3/16"

KX8  
Kydex-T Black 1/8"

KX4  
Kydex-T Black 1/4"

KXY  
Kydex-T Yellow 3/16"

KXY4  
Kydex-T Yellow 1/4"

Metal detectable blue ABS plastic is an option for the lightweight guard families and smaller guards. This material is an excellent alternative in the food and pharmaceutical industries where traditionally an all metal guard would be required. Following the current industry practice of using a highly visual material, guards in this material are available in blue only.

MD8  
Metal Detectable 1/8"

Other materials such as HDPE, Polycarbonate and other colors of ABS are available for special projects. For additional information, contact Machine Guard & Cover, Co. at 888.482.7371 or visit our website at [www.machineguard.com](http://www.machineguard.com).

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- Standard Flanged Guards (G) cover belt or chain drives with similar sized sheaves or sprockets.
  - The G backplate covers the back of the guard, which can be attached to guards through holes / brackets made through the flange. *NOTE: MGC normal manufacturing policy DOES NOT include cutting holes for shafts or make brackets for mounting. This can be done on special orders.*
  - If standard sized guards do not fit machinery, several guards may be re-sized to make a longer or shorter guard.
  - Height "A", Width "B" and Length "C" are measured at the smallest point on the inside of the guard.
  - Width "D" and Length "E" refer both to the dimensions of the guard measured at the flange and to the dimensions of the matching backplate.
  - Additional sizes are available, contact us for additional information.
- \* In order to provide additional strength, these backplates are made from 3/16" material. When made of black or yellow ABS, backplates are normally 1/8".
- Many of the guards in this series are available in lightweight material. Contact us for details.

### Available Materials:

3/16" ABS  
3/16" transparent PETG  
1/4" ABS  
1/4" Kydex

### Available Options:

Gaskets  
Hinges  
Extruded Aluminum Framework  
Powder Coated Extruded Metal Mesh

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

Our Safety Captured Fastener program has been designed for the maximum convenience of maintenance personnel while at the same time conforming to the most rigid "hand tool needed for removal" interpretation of ANSI regulations (ANSI B11.19-2010 Section 7.2.6 Guards).

This system includes: holes drilled for the fasteners, u-nuts on the backplate, and button head socket cap screws attached to the guard. The button head socket cap screws are matched to the thickness of the guard and backplate for a snug fit, and must be turned with a 5/32" hex driver. They are permanently installed with push retainers so they cannot detach easily.

Standardized Safety Captured Fastener mounting locations for each part number have been established. Should your guard application require custom locations, please contact us to discuss options.

### Available Materials:

3/16" ABS  
1/4" ABS  
3/16" transparent PETG  
1/4" Kydex

### Available Options:

Gaskets  
Hinges  
Extruded Aluminum Framework  
Powder Coated Extruded Metal Mesh

# Unflanged Guard Assembly Guide

---

1. Locate holes no less than 1/4" away from the edge of the backplate Tab.

Dimension "A" should be 7/16" for a 10-24 u-nut or 3/4" for a 1/4-20 u-nut.

Drill Clearance holes for machine screws.

3/16" for 10-24  
5/16" for 1/4-20

2. Make a reference mark on the edge of the backplate where the tab bends up.

Measure the distance from the back of the backplate to the center of the hole. This is needed to locate the corresponding mounting holes on the guard.

Slide the u-nut over the hole.

3. Place the backplate in the guard with tabs inward.

Using the marks and measurements from the previous steps, locate the screw holes for the guard.

Remove the backplate and drill the guard mounting holes using the same bit as in step one.

4. Locate and drill holes for shafts as needed.

**Guards are measured from the SMALLEST INTERNAL POINT unless specified.**

- Standard Unflanged Guards (UG) cover belt or chain drives with similar sized sheaves or sprockets.
  - The UG backplate covers the back of the guard, which can be attached to guards through holes / brackets made through the flange. *NOTE: MGC normal manufacturing policy DOES NOT include cutting holes for shafts or make brackets for mounting. This can be done on special orders.*
  - If standard sized guards do not fit machinery, several guards may be re-sized to make a longer or shorter guard.
  - Height "A", Width "B" and Length "C" are measured at the smallest point on the inside of the guard.
  - Width "D" and Length "E" refer both to the dimensions of the guard measured at the widest point and to the dimensions of the matching backplate.
  - Additional sizes are available, contact us for additional information.
- \* In order to provide additional strength, these backplates are made from 3/16" material. When made of black or yellow ABS, backplates are normally 1/8".
- Many of the guards in this series are available in lightweight material. Contact us for details.

### Available Materials:

3/16" ABS  
1/4" ABS  
3/16" transparent PETG  
1/4" Kydex

### Available Options:

Extruded Aluminum Framework  
Powder Coated Extruded Metal Mesh

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

Our Safety Captured Fastener program has been designed for the maximum convenience of maintenance personnel while at the same time conforming to the most rigid "hand tool needed for removal" interpretation of ANSI regulations (ANSI B11.19-2010 Section 7.2.6 Guards).

This system includes: holes drilled for the fasteners, u-nuts on the backplate, and button head socket cap screws attached to the guard. The button head socket cap screws are matched to the thickness of the guard and backplate for a snug fit, and must be turned with a 5/32" hex driver. They are permanently installed with push retainers so they cannot detach easily.

Standardized Safety Captured Fastener mounting locations for each part number have been established. Should your guard application require custom locations, please contact us to discuss options.

### Available Materials:

3/16" ABS  
1/4" ABS  
3/16" transparent PETG  
1/4" Kydex

### Available Options:

Gaskets  
Hinges  
Extruded Aluminum Framework  
Powder Coated Extruded Metal Mesh

### Tapered Unflanged Guards

### Tapered Unflanged Backplates

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- Tapered Unflanged Guards (UTG) cover belt or chain drives with different sized sheaves or sprockets.
- The UTG backplate covers are furnished with fasteners to attach the guard to the backplate, with extruded U nuts on the backplate. This ensures fastening of metal-to-metal. *NOTE: MGC normal manufacturing policy DOES NOT include cutting holes for shafts or make brackets for mounting. This can be done on special orders.*
- Height "A", Width "B", "B-1", and Length "C" are measured at the smallest point on the inside of the guard.
- Width "D", "D-1", and Length "E" refer both to the dimensions of the guard measured at the widest point and to the dimensions of the matching backplate.
- Additional sizes are available, contact us for additional information.

\* In order to provide additional strength, these backplates are made from 3/16" material. When made of black or yellow ABS, backplates are normally 1/8".

### Available Materials:

3/16" ABS  
1/4" ABS  
3/16" transparent PETG  
1/4" Kydex

### Available Options:

Extruded Aluminum Framework  
Powder Coated Extruded Metal Mesh

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

Our Safety Captured Fastener program has been designed for the maximum convenience of maintenance personnel while at the same time conforming to the most rigid "hand tool needed for removal" interpretation of ANSI regulations (ANSI B11.19-2010 Section 7.2.6 Guards).

This system includes: holes drilled for the fasteners, u-nuts on the backplate, and button head socket cap screws attached to the guard. The button head socket cap screws are matched to the thickness of the guard and backplate for a snug fit, and must be turned with a 5/32" hex driver. They are permanently installed with push retainers so they cannot detach easily.

Standardized Safety Captured Fastener mounting locations for each part number have been established. Should your guard application require custom locations, please contact us to discuss options.

### Available Materials:

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- Rectangular Unflanged Guards (URG) cover a variety of drives, sheaves, sprockets and other objects.
  - The URG backplate covers are furnished with fasteners to attach the guard to the backplate, with extruded U nuts on the backplate. This ensures fastening of metal-to-metal. *NOTE: MGC normal manufacturing policy DOES NOT include cutting holes for shafts or make brackets for mounting. This can be done on special orders.*
  - Height "A", Width "B" and Length "C" are measured at the smallest point on the inside of the guard.
  - Width "D" and Length "E" refer both to the dimensions of the guard measured at the widest point and to the dimensions of the matching backplate.
- \* In order to provide additional strength, these backplates are made from 3/16" material. When made of black or yellow ABS, backplates are normally 1/8".
- Additional sizes are available, contact us for additional information.

### Available Materials:

3/16" ABS  
1/4" ABS  
3/16" transparent PETG  
1/4" Kydex

### Available Options:

Extruded Aluminum Framework  
Powder Coated Extruded Metal Mesh

# Flanged Bearing Cover Installation Guide

*Bearing covers should cover the entire bearing. Attachment methods differ based on the mounting structure available. Machine Guard & Cover cannot be responsible for a bearing cover installed improperly.*

1. Test fit your cover for adequate clearances. The flanges on the cover can be trimmed away as needed to avoid obstructions. If your bearing has a grease fitting you may drill or cut the cover for access. Covers may be installed using either self-tapping screws or machine screws.
2. To install with the optional supplied self-tapping screws, drill a pilot hole through the cover and structure with a 1/8" to 7/32" drill bit. Use the first hole to attach the cover to the structure.
3. To use the optional supplied machine screws, use a drill bit to make a pilot hole in the cover, and a pilot mark in the structure. Expand the cover hole with a 1/4" drill bit. Drill and tap a structure hole for 1/4"-20 threads. Use the first hole to attach the cover to the structure.
4. Drill the second hole following steps 2 or 3 as appropriate. Remove the cover if you need to drill and tap the structure. Re-install the cover to the mounting structure. Fasten all screws.

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- For covering 2-bolt flange bearings.
- All 2-bolt bearing covers have clearance for grease fittings.
- For installation instructions, see 'How to Install a Flange Bearing Cover' on Page 37.
- \* *Bearing covers with a grease fitting on the reverse side.*
- \*\* *Bearing covers with grease fittings on both the regular and reverse side.*
- For tall shafts, height can be added just to the round top part of the cover.
- Lightweight Guards are designed for non-abusive environments.
- Our metal detectable ABS plastic is FDA approved for certain pharmaceutical and food applications. Contact us for specific details.

SPBDSC210	5	3 1/2	3	8 5/16	2 1/4	3 1/2				

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- Skabbard™ Pillow Block Covers integrate with the MGC shaft cover line to completely enclose the bearing and shaft.
- One or both ends of the guard can be opened for a through shaft.
- Skabbard™ Pillow Block Bearing Covers may be installed using similar installation methods as shown on Page 35.
- If you do not see what you are looking for, give us a call!

### Available Materials:

3/16" ABS

1/4" ABS

3/16" transparent PETG

1/4" Kydex

## Take-Up Bearing Covers

All dimensions measured in inches

Example Part Numbers	Height "A"	Width "B"	Length "C"					
TBC3x4x6	3	4	6					
TBC10x16x48	10	16	48					

- Covers the bearing and the adjustment mechanism.
- The standard flange for Take-Up Bearing Covers is 1".
- Sizes listed are suggestions, please call for quote.
- The maximum Length for a TBC Guard is 48".  
(Flange(x2) + Height(x2) + Width) cannot be more than 96"
- TBC Guards can have one or both ends closed as an option.

### Available Materials:

3/16" ABS  
1/4" ABS  
3/16" transparent PETG  
1/4" Kydex

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- The BSC family of shaft covers is designed to cover exposed rotating shafts and attached bearing.
- Modeled to fit over a 4-bolt bearing, but can accommodate other flange bearing and shaft assemblies.
- Length "C" can easily be modified for your custom installation.
- Additional sizes are available, contact us for additional information.
- The BSC series of guards includes Safety Captured Fasteners.

Available Materials:

3/16" ABS

1/4" ABS

3/16" transparent PETG

1/4" Kydex

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- Coupling Cover Fabricated Boxes are manufactured from three pieces using a high strength adhesive.
- The standard flange on all CCFB guards is 2".
- A variety of fabricated parts can be made. Contact us to discuss your specific requirements.

### Available Materials:

3/16" ABS  
1/4" ABS  
3/16" transparent PETG  
1/4" Kydex

## Conveyor Covers (straight) - Heavyweight

All dimensions measured in inches

Part Number	Height to Top "A"	Height to Shoulder "D"	Width "B"	Length "C"	Extension "E"	Extension "E1"		
* CRS2.50848H	2 1/2	1	7 3/4	48	1 7/8	0		
CRS30960H	3 1/2	1 3/4	9 1/4	60	3	0		
CRS312.560H	3	1	12 1/2	60	2	0		
CRS609.748H	6	3 1/4	9 3/4	48	2 1/4	2 1/4		

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- Conveyor Covers - Straight (CRS) are especially popular for food and pharmaceutical processing applications.
- Our PETG and metal detectable ABS plastics are FDA approved for certain pharmaceutical and food applications. Contact us for specific details.
- \* Denotes that the extension is an underlap instead of overlap.
- If you do not see what you are looking for, give us a call!

### Available Materials:

3/16" ABS  
1/4" ABS  
3/16" transparent PETG  
1/4" Kydex

## Conveyor Covers (straight) - Lightweight

All dimensions measured in inches

Part Number	Height to Top "A"	Height to Shoulder "D"	Width "B"	Length "C"	Extension "E"	Extension "E1"		
* CRS2.50848L	2 1/2	1	7 3/4	48	1 7/8	0		
CRS30960L	3 1/2	1 3/4	9 1/4	60	3	0		
CRS312.560L	3	1	12 1/2	60	2	0		

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- Conveyor Covers - Straight (CRS) are especially popular for food and pharmaceutical processing applications.

- \* Denotes that the extension is an underlap instead of overlap.
- If you do not see what you are looking for, give us a call!

### Available Materials:

1/8" ABS

1/8" ABS Metal Detectable

## Conveyor Covers (curved) - Heavyweight

All dimensions measured in inches

Part Number	Height to Top "A"	Height to Shoulder "D"	Width "B"	Extension "E"	Extension "E1"	Radius Centerline "G"	Degree of Turn "J"	
CRR2.5087.2H	2 1/2	1	7 3/4	2	2	7 1/4	180	
CRR2.5088.2H	2 1/2	1	7 3/4	3	3	8 1/4	180	
CRR2.50811H	2 1/2	1	7 3/4	3	3	11	180	
CRR2.50824H	2 1/2	1	7 3/4	2	2	24	90	
CRR30924H	3	1 3/4	9 1/4	0	0	24	90	
CRR609.717H	6	3 1/4	9 3/4	3	0	17	90	
CRR609.724H	6	3 1/4	9 3/4	1	0	24	45	
CRR7x24	7	4	6	0	0	24	90	

**Guards are measured from the SMALLEST INTERIOR POINT unless specified.**

- Conveyor Covers - Curved (CRR) are especially popular for food and pharmaceutical processing
- Our PETG and metal detectable ABS plastics are FDA approved for certain pharmaceutical and food applications. Contact us for specific details.
- If you do not see what you are looking for, give us a call!

### Available Materials:

Custom lettering available via forming or engraving text or your company's logo directly into your guards.

Extra-large guards and square boxes can be fabricated instead of thermoformed. Components can be fixed together using a high-strength adhesive or multiple guards can be attached with hardware to make a larger assembly.

Mounting holes can be added, flange widths changed, or using CNC routing, custom standard parts can be custom trimmed to your specifications.

Low volume custom parts can be produced using prints, sketches, CAD or solid model files. The in-house design team at Machine Guard & Cover Co. will work to create a guard for your specific needs.

Kydex and PETG are resistant to many chemical compounds. ABS can withstand temperatures up to 200°F. PETG can withstand up to 180°F. Kydex has a fire resistance rating of UL Std. 94 V-0, 5V.

Blue, metal detectable ABS plastic and PETG are FDA approved for certain pharmaceutical and food applications. Contact us for specific details.

Useful in the food and pharmaceutical industries, plastic guards can be sterilized with steam and most detergent solutions.

Thick plastics are lighter, sound dampening and impact and corrosion resistant and when compared to the rising cost of stainless steel fabrication or aluminum casting thermoformed guards offer an average of 50% cost savings.

	3/16" ABS
	1/8" ABS
	1/8" ABS Metal Detectable*
	1/4" ABS
	1/8" and 3/16" transparent PETG*
	1/4" Kydex

*Material specifications available upon request.*

\* PETG and metal detectable ABS are FDA food grade approved materials.

Please Note: Finished thermoformed parts are thinner than the original material due to stretching in the manufacturing process.
